

General characteristics

Modular range of devices for domestic and similar uses on frames for flush-mounting boxes of up to 18 modules. It includes controls, socket-outlets, protections, indicators, connectors and a vast range of electronic components for domestic and special services. There are also boxes and plates for surface-mounting and free-standing applications.

TECHNICAL DATA AND REFERENCE STANDARDS							
Component	Reference standards	Essential electrical data*			Prolonged operation (no. position changes)	Resistance to abnormal heat and fire	
		Resistance at test voltage (V)	Insulation resistance (MΩ)	Breaking capacity or category of use		Thermo-pressure with ball (°C)	Glow wire test (°C)
Commands	EN 60669-1	2000 at 50 Hz for 1 minute	> 5	1.25 I _n (200 position changes)	40,000 at I _n 250V AC cos φ = 0.6	125	850
Socket-outlets	IEC 60884-1			1.25 I _n (100 position changes)	10,000 at I _n 250V AC cos φ = 0.8		
Latching relays	EN 60669-1 / EN 60669-2-2				50,000 at I _n 250V AC cos φ = 0.6		
Momentary relays	EN 60669-1 / EN 60669-2-2			1.25 I _n (200 position changes)			
Miniature circuit breakers	EN 60898-1			3 kA	8,000		
Residual current circuit breaker with overcurrent protection	EN 61009-1 / EN 61008-1			2** ÷ 5	3 kA		
Supports and plates	EN 60669-1	-	-	-	-	70	650

* For rated voltages and currents, see the specifications in the single codes. ** The value of 2 MΩ refers to a special condition established by the Standards given alongside.

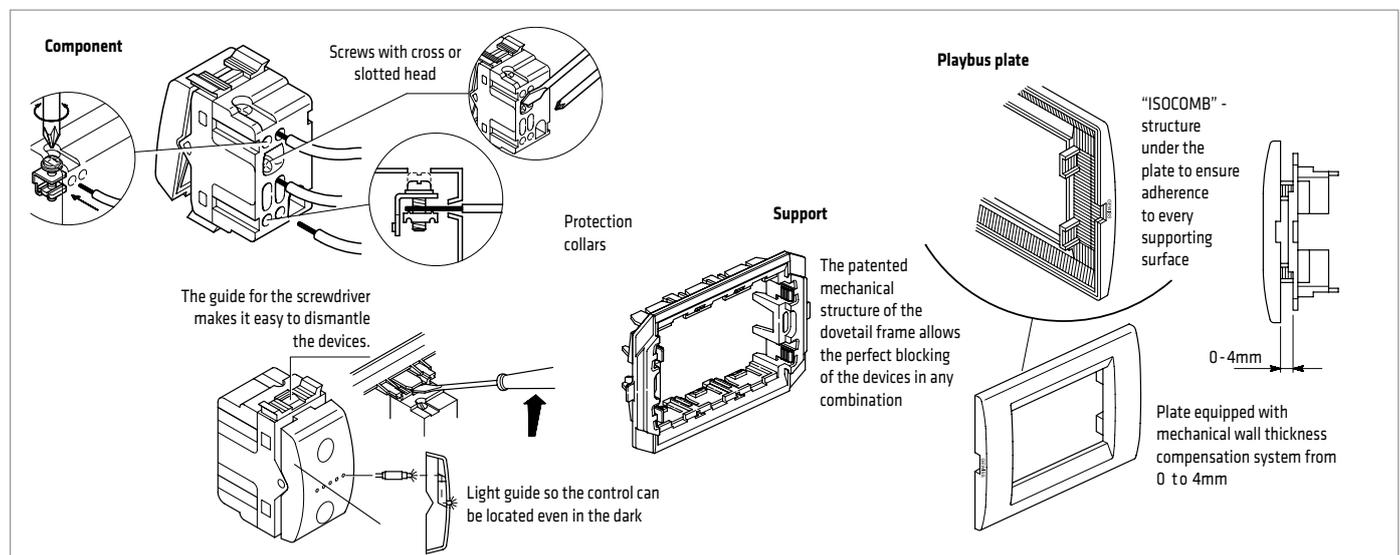

Terminal resistance to cable traction: > 50N

Device hold on support: > 0.6J

TERMINAL TIGHTENING CAPACITY			
Flexible wires		Rigid wires	
Minimum 0.75mm ²	Maximum 2 x 4mm ²	Minimum 0.5mm ²	Maximum 2 x 2.5mm ²

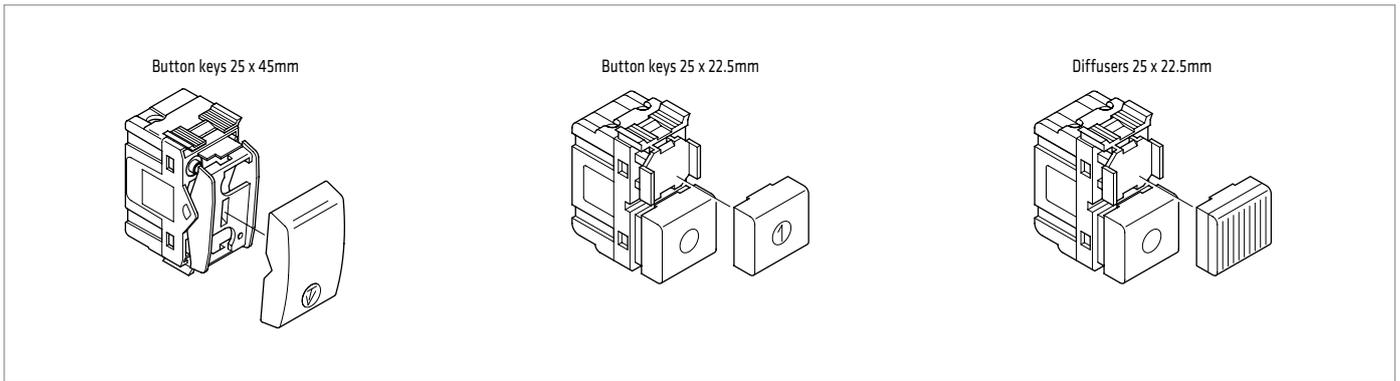

THE TECHNICAL CHARACTERISTICS OF THE FOLLOWING PLAYBUS PRODUCTS ARE DESCRIBED ON THE TECHNICAL PAGES OF THE SYSTEM RANGES	
Infrared movement detector	Telephone socket-outlets
Anti black-out lamps	Latching relays and momentary relays
Dimmers	TV-SAT socket-outlets
Timed-thermostats	Automatic circuit breakers

Common construction features

Interchangeability of button keys and diffusers

Backlighting of control devices

Type	Functional characteristics	Applications	Type	Functional characteristics	Applications
 <p>Night-time location</p>	<ul style="list-style-type: none"> Permits the identification of the control button key even in the dark. You are advised to use the Gewiss lamps: white/red/light blue. 	<ul style="list-style-type: none"> Bedrooms. Corridors. 	 <p>Iconographic signalling</p>	<ul style="list-style-type: none"> Permits the identification of the control button key, and its specific function, even in the dark. 	<ul style="list-style-type: none"> General services. Internal systems for offices, shops, warehouses. Hotel structures. Hospitals and nursing homes.
 <p>Functional signalling</p>	<ul style="list-style-type: none"> Permits the identification of the control button key, or the indication of the ON/OFF status of a lighting circuit, even in the dark. With a red/white/light blue lamp, the signalling is bright. With a green lamp the lighting level does not cause sleep disturbance. 	<ul style="list-style-type: none"> General services of a building complex (stair lights, entrances, etc.). Public entertainment premises 	 <p>With diffuser lamp</p>	<ul style="list-style-type: none"> Permits the identification of the ON/OFF status of a user or lighting circuit from a considerable distance. Visible from both front and side. 	<ul style="list-style-type: none"> Signalling lights coming on outside the place where the control device is installed.

Degree of protection of the set of PLAYBUS domestic range assembly installed

Component	Installation	Reference standard	IP rating
Devices with closed front (commands, bells, indicators, etc.) installed in flush-mounting boxes, surface-mounting boxes, free-standing panels (completed with support and plate) and in self-supporting boxes	Flush-mounting for domestic or similar finish, in vertical position, installed to a high standard	EN60529 (CEI 70-1)	41
Devices with open front (socket-outlets, etc.) installed in flush-mounting boxes, surface-mounting boxes, free-standing panels (completed with support and plate) and in self-supporting boxes	Flush-mounting for domestic or similar finish, in vertical position, installed to a high standard. Suitable for use for zone 3 of rooms containing baths or showers.		X1 (in case of socket-outlets it is 21)
Devices with open front (socket-outlets, etc.) installed in flush-mounting boxes, surface-mounting boxes, free-standing panels (completed with support and plate) and in self-supporting boxes	Flush-mounting for domestic or similar finish, in vertical position, installed to a high standard with plug inserted		4X

ACCESSORIES

Lift/emergency plates			Miniature lamps				Luminous / colour result	Possible colours		
			Type	Code	Voltage	Colour	The signalling colour corresponds to the colour of the chosen miniature lamp	White		
									LED	GW 10 893
			GW 30 947	230V AC	Red					
Fluorescent	GW 30 943									

Examples of functional and localisation lighting

To indicate the operating status of services not visible from the command position

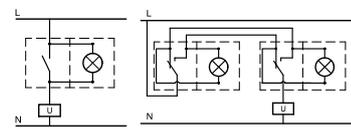

The indicator lamp is located parallel to the service, and is switched on when the one-way switch is ON. The indicator lamp follows the ON/OFF status of the service.

The two indicator lamps and the service are placed in parallel, therefore they switch on and off together with the service.

To locate the command button key in the dark

The indicator lamp is switched on when the one-way switch is OFF. With the one-way switch in the ON position, the service is powered and the indicator lamp is switched off.

The two indicator lamps come on when the service is not powered and go off when it is ON.

NOTE: layouts not suitable for commanding compact energy saving lamps and/or relays
